SUMMARY

AI & Data Engineer building enterprise AI/data solutions and deployed GenAI applications across machine learning, full-stack engineering and MLOps.

TECHNICAL SKILLS

Languages: Python, Java, SQL, TypeScript, JavaScript, C/C++

AI / ML: PyTorch, TensorFlow, scikit-learn, Pandas, NumPy, OpenCV

GenAI: LLM applications, RAG, Agentic AI, LangChain, Groq, AI SDK

Frontend: React, Vite, Tailwind CSS, Streamlit, HTML/CSS

Backend: FastAPI, Fastify, Node.js, Spring Boot, REST APIs, Better Auth, JWT

Data: PostgreSQL, Supabase, MySQL, MongoDB, Databricks, PySpark, Delta Tables

MLOps / DevOps: MLflow, Docker, CI/CD, Git, GitHub Actions

Testing: Unit / integration tests, Playwright

EDUCATION

Vellore Institute of Technology, Chennai
B.Tech in Computer Science Engineering Artificial Intelligence & Machine Learning
2022 – 2026 | CGPA: 8.1/10

St. Thomas School, Kanpur
Secondary School | 2021–22 | 92%
High School | 2019–20 | 89%

CERTIFICATIONS

MLOps Zero to Hero
Udemy | 14 Sep 2026 | 12.5 hours

ML Practitioner Series — 6 courses
Databricks Academy | Apr–May 2026

Master LangChain & Gen AI — Build #16 AI Apps HuggingFace LLM
Udemy | 2 Dec 2025 | 10 hours

The Complete Full-Stack Web Development Bootcamp
Udemy | 11 Jul 2025 | 61.5 hours

Data Structure & Algorithms in Java for Intermediate Level
Great Learning Academy | Aug 2023

LAABH GUPTA

AI/ML Engineer | Software Engineer | MLOps & DevOps

PROFESSIONAL EXPERIENCE

Ernst & Young Global Delivery Services

AI & Data Engineer | Jun 2026 – Present

Converted to full-time AI & Data Engineer after the Jan–May 2026 internship.

AI & Data Intern | Jan 2026 – May 2026

Agentic Data Ingestion Platform

- Built agentic discovery and ingestion workflows across cloud data sources using Streamlit, Databricks Unity Catalog, LangChain and REST APIs.
- Standardized ingestion with reusable JSON configuration to reduce manual setup and errors.

MLOps Experiment Tracking Dashboard

- Developed a React / FastAPI dashboard for MLflow runs, metrics and model comparison on Databricks using PySpark, Delta Tables and Databricks SQL.
- Improved experiment visibility and traceability for stakeholders beyond the default MLflow UI.

Hindustan Aeronautics Limited

Tech Intern | Jun 2025 – Jul 2025

- Developed and deployed a Node.js / MySQL application for aircraft-part manufacturing cost estimation: man-hours, standard rates and material costs.
- Secured the app with express-session, bcrypt and role-based access; optimized MVC computations, improving decision-making speed by approximately **25%**.
- Used GitHub for version control and CI/CD deployment workflows.

KEY PROJECTS

ArguLab — Personalized AI Coaching Platform

2026 | Live app | GitHub

- Built **nine AI coaching modes** for interviews, communication and reasoning: debate, group discussion, interview, public speaking, extempore, negotiation, case discussion, real-world simulation and observer analysis.
- Engineered an **adaptive personalization loop** that summarizes prior sessions, tracks strengths and weaknesses, persists user-specific context in Supabase PostgreSQL, and applies it to future AI sessions.
- Built a mobile-responsive React 19 / TypeScript / Vite frontend and Fastify APIs with Better Auth, rate limiting, user data ownership and persistent, resumable session history.
- Integrated Groq / AI SDK for streaming conversations and structured feedback on claims, evidence and reasoning; added Whisper transcription, editable drafts and browser text-to-speech.
- Deployed the frontend to **Netlify**, backend to **Render** and database to **Supabase PostgreSQL**; configured backend Docker containerization.
- Verified v3.0.1 with **47 unit/integration tests** and **21 Playwright browser tests**.

Voice Anti-Spoofing System

Project Lead | Dec 2024 – Mar 2025 | Live app

- Built a PyTorch classifier for AI-generated vs. human speech using Mel spectrograms, CNNs, a Vision Transformer and data augmentation; achieved **99.75% test accuracy**.
- Served PyTorch models via FastAPI REST endpoints and deployed a React frontend for audio classification.

ACHIEVEMENTS

- **LeetCode:** 370+ problems solved; Top 2% globally.
- **HackClub:** Selected among the Top 20 AI/ML students nationally.
